Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 6-9, 25-28, drawn to a method of collecting information regarding home attributes and posting data for access by users, classified in class 705, subclass 1.
- II. Claims 10-21, 23, 24 drawn to a method of collecting home attribute information and managing scheduling of appointments to see homes, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions I and II are not capable of use together since invention I does not have a calendar to allow it to schedule appointments which invention II requires. Also, because invention II requires an electronic calendar that invention I does not require, the two inventions have different designs. Thus the two sets of inventions have different designs and are not capable of use together.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected

invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Ryan Durham on March 24, 2009 a provisional election was made with traverse to prosecute the invention of I, claims 1-4, 6-9, 25-28. Affirmation of this election must be made by applicant in replying to this Office action. Claims 10-21, 23, 24 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-9, 25-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Wise (US 2004/0098269 A1).

As to claims 1, 25-28 Wise shows providing question data (Fig.1A) to a voice services node (paragraph 101 "*...data entry by way of voice commands...*");

providing a set of verbal questions to a real estate seller about a real estate listing corresponding to the question data from the voice services node over a voiced call, wherein the question data includes at least one of textual data (Fig.1A) and a set of pre-recordings, and wherein the set of verbal questions are derived from the question data through text-to-speech conversion if the question data is textual (paragraph 101 *where voice commands would be interpreted by the digital recording tool*);

receiving verbal answers to the set of verbal questions from the real estate seller in the voiced call at the voice services node of an automated system (paragraph 101);

interpreting the received verbal answers to produce listing data through at least one of: speech recognition and natural language understanding (paragraph 101); and

posting the listing data for access by real estate customers through at least one of a web page and a communications network (paragraph 102 "*...web application allows subscribing agents to view, add and edit listings*").

As to claim 2, Wise inherently shows providing first question and waiting for response (paragraph 101).

As to claims 3, 4 Wise shows being responsive to previously asked question (Fig.2).

As to claims 6, 9 Wise shows posting the data (Fig.5B).

As to claim 7, Wise shows the voiced calls being wireless or cable (paragraph 123).
